

How Did Your Garden Grow?

2009 WCMGVA Sanctioned Core Project Leads and Individual Project Leads:

Earlier this year you were asked to identify the goals of your projects. Keeping in mind the community education focused mission of our WCMGV association, your goals focused on the difference each of your projects were to make in the community this year.

To close out the year, you are now asked to complete a brief summary of your project outcomes. Your report will provide a glimpse into the work that was accomplished, the difference the work made in the community, and who worked on the project to make that difference. The report will also provide accountability for the work that was done, especially because the time that members claim as volunteer hours should be substantiated in some way. *Even if your project didn't quite go as planned, please provide a summary of what happened.*

Submit your project report by October 1st using the format attached.

It shouldn't take you more than 30 minutes, depending on what you report. Please type or print the answers on following sheet (try to limit your report to 2 pages) and mail it to Steve Schueler at 1402 Powers Street, Oshkosh, WI 54901. **OR** Download this form from our website at www.winnebagomastergardeners.org, complete it, and e-mail it back to me at stevselinda@new.rr.com.

If you have pictures of your projects for our association archives, please send them along. They will get entered into the association archives.

Our association board of directors has requested that each project lead make a brief (5 minute) presentation at either the October or November membership meetings.

This will be an opportunity to show off all of the great work done over the past year. How you make your presentation is up to you—slideshow, narrative, pictures, display board, whatever! The information you provide will build interest in your project and help with volunteer recruitment next year. *Please let either of our co-chairs, Kathy or Mary, know which meeting you prefer to present at so that they can plan for you in the agenda.*

Thanks for your work in support of our association,
Steve Schueler
VP/Projects coordinator
